

Coaxial cables with FME-connector

DESCRIPTION

- The applied RG 58 A/U-L FME coaxial cables are special Procom-designs having a very low loss for RG 58 standard type coaxial cable (below 0.5 dB per m at 900 MHz) and a very precise 50 Ω characteristic impedance. The cables are produced under continuous automatic control to ensure the high quality.
- In the design of the FME-connectors the SWR has been minimized ensuring low mismatch loss and maximum power transfer.
