DESCRIPTION

› Flexible antenna made of steel wire covered with black silicone tubing.
› End-fed ½ λ whip – groundplane independent.
› High gain and efficient decoupling from the portable equipment due to half-wave design.
› 3 dB gain (typ.) compared to a ¼ λ antenna whip on the same equipment.
› Highest quality materials in a long-lasting and durable design.
› Delivered factory tuned to customer specified frequency or cellular system.
› Provided with universal FME-connection system for optimum flexibility and easily exchangeable connectors.
› Designed for use with the following of Procom's line of black FME-connectors (to be ordered separately): BFME-BNC, BFME-TNC, BFME-N, BFME-MUHF, BFME-EBNC, BFME-ETNC and BFME-EMUHF.
